

YOUR GUIDE TO A MORE RESPONSIBLE STAY

Our commitment to the environment has deep roots. It all began in 2011 with LifeGate, a journey of continuous improvement that reached a milestone in 2025: the internationally recognised GSTC certification.

What does this mean for you? Everything. By choosing us, you are not simply choosing an “eco-friendly” label, but a globally recognised standard that ensures transparency, concrete actions, and real benefits for our local community. We are proud to be the first and only hotel in Pordenone to offer you this level of commitment and trust.

PARKHOTELPORDENONE

**in this guide,
you'll find simple
and practical tips
to make your
stay in our town
more conscious,
meaningful, and
sustainable**

1. Enjoy a breakfast that cares for the planet

We have replaced the traditional buffet to help reduce food waste, without compromising on variety.

Self-service selection: help yourself to fresh fruit, homemade cakes, pastries, and baked goods.

Table service: everything else is freshly prepared and served to order — fresher choices for you, less waste for the planet.

Did you know? We support local biodiversity by adopting beehives from Canais - Fattoria Rurale Bio, an organic farm in ore region since 2003. You can adopt your own beehive too through their website!

2. Discover Pordenone at a slower pace

Pordenone is a walkable, human-scale city, perfect to discover sustainably.

By bike: ask us for our bicycles (including e-bikes!) and explore the Ciclabile dei Parchi cycle route, enjoy the peaceful banks of the Noncello River, or discover the charming streets of the historic centre.

On foot: the city centre is just a few steps away. Strolling beneath the frescoed arcades is the best way to discover the details of the “*painted city*”. At reception, you can request the audio guide and explore Pordenone at your own pace in around two hours, uncovering stories and hidden corners along Corso Vittorio Emanuele, the Gothic Town Hall, and the Adam and Eve Bridge, following the footsteps of the great Renaissance painter *Il Pordenone*.

By public transport: trains and buses make it easy to explore the surrounding area. Check timetables online or ask our reception team for help.

Travel more consciously: calculate the carbon footprint of your journey, reduce your impact, and choose to offset your emissions. Small choices make a difference.

3. Help protect our resources: energy, water and waste

Small actions in your room can make a big difference.

Your towel choice: leave your towel hanging if you would like to use it again. If you leave it on the floor, we will replace it. Fewer unnecessary washes mean less detergent and a lower environmental impact.

Skip the linen change: for stays of more than 2 nights, choose to skip housekeeping service and receive 500 bonus Best Western Rewards® points.

Smart energy use: your room's electricity is connected to your key card, helping prevent unnecessary energy consumption when you are away. The same applies to the window: when it is open, heating and air conditioning automatically switch off. Need to charge your devices while you are out? Use the green power socket in your room — it is the only one that remains active.

Save water: use your own reusable bottle or purchase one from our shop.

Let's recycle together: please help us sort waste correctly and avoid leaving litter behind when exploring nature. In your room, don't worry if you cannot separate everything perfectly — we will take care of it during housekeeping, ensuring each material is properly recycled or disposed of.

4. Shop local: take a piece of our region home

In our lobby, you'll find a selection of local products. By choosing them, you support small local businesses and help preserve the traditions of our region. Explore local markets and historic shops to discover even more authentic treasures. What local treasures should you discover?

Pitina (PGI): a speciality from the Tramontina Valley: a unique smoked and seasoned meat delicacy, protected as a Slow Food Presidia product.

Asino cheese: one of Friuli's oldest cheeses: savoury, creamy, and made in our local valleys.

Figo Moro da Caneva: a local biodiversity treasure, delicious as a preserve or caramelised treat.

Biscotto Pordenone: a traditional sweet from Pordenone, made with simple ingredients that tell the story of the city's culture and traditions: wheat flour, corn flour, sugar, almonds, butter, egg yolk, grappa, and coarse salt.

Grave wines: the grave — the characteristic stones surrounding Pordenone — give local wines their distinctive minerality. Discover a Friulano white wine or a Refosco dal Peduncolo Rosso red wine.

Maniago cutlery: world-renowned blades combining design and traditional craftsmanship.

Spilimbergo mosaic art: small works of art celebrating the heritage of one of the world's most renowned mosaic schools.

Scarpets: iconic handmade Friulian slippers, now a symbol of timeless artisan elegance.

More than rules, these are simple choices that respect the place and the people who welcome you. Responsible travel begins with small actions that can inspire positive change.

Thank you for being part of this journey with us.
